Likely on my old PC somewhere... or one of the linux servers. I would go the the casnet website and find the naming convention of the ozone data download and search for a similar file on my old PC. That directly will likely contain whatever I was doing with it... don't even recall now. If you don't find it there try the linux servers.

Subject: CASTNET Data Question

Hey Andy,

I was talking with Tom regarding the CASTNET data and he said he believed you had done some previous work with this data. I was wondering if you knew where this would be at – possibly on the T Drive or your computer's hard drive maybe?

Thanks and take care,

Chris Dobbs
